

F. Rectangular

$$\mathcal{M} = a + bj$$

$$\mathcal{M}^* = a - bj$$

F. Polar

$$\mathcal{M} = M \angle \varphi$$

$$\mathcal{M}^* = M \angle -\varphi$$

(* $\equiv$ conjugado)

F. Exponencial

$$\mathcal{M} = M e^{j\varphi}$$

$$\mathcal{M}^* = M e^{-j\varphi}$$

Fórmula de Euler

$$e^{j\varphi} = \cos \varphi + j \cdot \text{sen } \varphi$$

$$M = \sqrt{a^2 + b^2}$$

$$\varphi = \arctan \frac{b}{a}$$

$$a = M \cos \varphi$$

$$b = M \text{sen } \varphi$$
