

$$e_R(t) = \sqrt{2} \cdot \sin(\omega t)$$

$$e_S(t) = \sqrt{2} \cdot \sin(\omega t - 120^\circ)$$

$$e_T(t) = \sqrt{2} \cdot \sin(\omega t + 120^\circ)$$

Circuito eléctrico equivalente

$$\mathcal{E}_R = E \angle 0^\circ$$

$$\mathcal{E}_S = E \angle -120^\circ$$

$$\mathcal{E}_T = E \angle 120^\circ$$
